

Press release For Immediate Release

FDC Composites Inc. Obtains quality certifications AS 9100 revision C, and ISO 9001: 2008

Saint-Jean-sur-Richelieu (Quebec) Canada , May 22, 2014 - FDC Composites Inc. is pleased to announce that it has obtained the AS 9100 revision C, and ISO 9001: 2008 Quality Certifications. The AS 9100 standard was awarded to FDC Composites Inc. for the manufacturing, assembly and design of composite parts for the aerospace industry. It is the highest quality standard in this industry. The AS 9100 is a double certification. It includes all requirements of the ISO 9001:2008 certification, plus hundreds of additional requirements specific to the safety and reliability of aerospace products.

"The AS9100 certification will benefit all our customers, in all industry sectors. It is the fruit of unmatched efforts by our whole team. It is another example of the exceptional development of our company since its beginnings in 2009, barely 5 years ago", says Jacques Cabana, President and Chief Executive of FDC Composites Inc. "for us, this certification is just the first major step in the evolution and growth of our company, which is now resolutely turned towards continuous improvement and the search for excellence. Our only goal is to always improve the satisfaction of our customers. We have come a long way and all are welcome to come witness our continued evolution."

FDC Composites Inc. specializes in **Value Added Built to Print Manufacturing** of composite parts & assemblies primarily for original equipment manufacturers (OEM) in the transportation industry (aviation and rail).
